

Anteis S.A.
Chemin des Aulx 18
1228 Plan-les-Ouates
Geneva / Switzerland

Merz Anteis SA is a major global player in the field of injectable medical devices derived from the processing of biopolymers. Specializing in the development and manufacture of high-quality biomedical products for aesthetic medicine, Merz Anteis employs over 200 people at two production sites in the Geneva and Morges regions.

Products manufactured by Merz Anteis are distributed by Merz Aesthetics, an international company in the field of aesthetic medicine. Every day, over 1,600 Merz Aesthetics employees in 36 countries are committed to restoring and maintaining the beauty of the skin.

Merz Anteis and Merz Aesthetics belong to the Frankfurt-based Merz Group.

Would you like to contribute to our success? Then join Merz Anteis!

We are recruiting for our Lonay's site:

QC Microbiology Manager

The following responsibilities await you:

- Direct and Manage the QC Microbiology department
- Identify and/or facilitate implementation of quality control improvements or projects in accordance with cGXP and applicable standards expectations and evolutions (USP, Ph.Eur.) to improve compliance, quality levels (reducing OOS), and improve operational efficiencies.
- Monitor quality metrics to identify systemic microbiological issues assuring appropriate investigation, correction, and corrective and preventive action when needed.
- Support internal and external audit activities, to include pre-audit planning, including development of audit plans, audit execution and evaluation and post-audit follow up and recommendations.
- Ensure applicability of current company policies, procedures and objectives by keeping informed of the latest updates/modifications related to applicable global, federal and local regulations (ISO, MDD, MDR, Ministries of Health (FDA, EMA, Health Canada, TGA, ANVISA, etc.) that govern Merz activities.

What we expect from you:

- Master in Microbiology
- Minimum 5 years of professional experience in Medical Devices / Pharmaceuticals company
- Experience in the application of microbiological techniques in various microbiological techniques for products testing (bioburden, endotoxin and sterility testing) and for environment monitoring
- Management experience
- Lab Equipment IQ/OQ/PQ experience
- Business fluent English in written and spoken
- Proficient in MS Office products including, Word, Excel, Outlook, and Power Point

What you can expect from us:

- **Ongoing training:** Your personal and professional development is key to our success. To this end, you have regular access to specialist training, language courses or personal development sessions.
- **Work-life balance:** Our time is precious; to help you reconcile your work and leisure time, we allow flexible working hours between 6.30am and 8pm, depending on the position. We also give you the opportunity to telework up to 2 days a week if your workstation allows it. Our employees also benefit from generous annual leave arrangements.
- **Benefits:** Your day-to-day social security is important to us. We have set up premium accident insurance cover so that you can be looked after under the best possible conditions throughout Switzerland. We also invest in your retirement: our LPP plans allow you to save more than the legal minimum without any impact on your net income, as the company pays 2/3 of the contributions.
- **Sustainable development:** The Merz Group is investing at every site to achieve carbon neutrality by 2035.

We look forward to receiving your full application!
